📍 30 Omorogbe Street, Eyean, Benin City, Edo State (Willing to relocate)

OBJECTIVE

I am an Intermediate software developer(Front End), as well as a graduate of Petroleum Engineering, seeking employment with a fast-growing startup. I bring sound knowledge and experience writing JavaScript and Reactjs and building scalable and very responsive web apps. I seek challenging opportunities where I can grow and at the same time achieve organizational goals and more.

EXPERIENCE

01/06/2020 - 02/08/2020

Hotels.ng (HNGi7)
Front End developer intern
- I was involved in the rigorous and fast paced HNG internship till the last stage.
- I built several front end projects.
- I learnt alot

06/03/2017 - 28/06/2017

Nigeria Petroleum Development Company
Administrative and Field industrial trainee
- I worked in the office of the SEPLAT/NPDC JV office in NPDC as an administrative intern.
- I worked in 4 of SEPLAT PETROLEUM DEVELOPMENT COMPANY fields at Sapele, Delta state, where I did my field training.

EDUCATION

2018

University of Benin
Petroleum Engineering
Second Class

- CSS
- JavaScript
- Bootstrap
- Reactjs
- jQuery
- SASS
- Nodejs
- MySQL
- Redux
- Team building
- Team leading
- Computer literacy
- Microsoft Office
- Ability to learn quickly

- Ability to work under pressure
- Attention to detail

PROJECTS

- Web portfolio
  https://wisdomosara.github.io/webport1
  I did a Web developer portfolio as part of a product during my HNGi7 internship and decided to convert it to a temporary portfolio website for myself.

- Countries Rest APIs
  - A challenge on frontendmentors.io
  - Uses the Rest APIs for countries.
  - A lot of Api consumption was involved and lots of DOM manipulations.
  - Also there's a dark mode.

  https://wisdomosara.github.io/countries

- BeSilent landing page
  - A project from the HNGi7 internship.
  - It involves a product landing page with animations.
  - Also I did an email capture which stores to the MySQL database.
  - This was my first dive into backend development.

  https://wisdommasterlanding.herokuapp.com

- Reactjs slide
  - A personal project which relies heavily on the power of React JavaScript State.
  - It's basically a sleek slideshow that gives you a quick view at the start before it loads.

  https://wisdomosara.github.io/slide

- Fund my laptop Reactjs project
  - I was part of the team that built the fundmylaptop webapp.
  - It was a huge Reactjs codebase and I did the campaigns page.
  - I used React components, React-router, React-Redux, Axios for Api calls and consumption etc. Virtually all package of React was used. All data from the backend
